Reserve Testbed

Testbed may be ***reserved*** to ensure availability. If you open a Testbed but do not lock or reserve it, another user may lock or reserve the Testbed and your session will be terminated.

You will be blocked from using the Testbed for the reserved time period of the other user. Users should reserve a Testbed to guarantee its availability.

- Use the search Testbed filter.
- Testbed are represented with Testbed name, required testbeds are dragged to selected Testbed column.
- On clicking reserve button a pop up appears on screen, fill the input parameters reservation Name, select the accessible Users and reserveAt for reserving testbed now or later.
- For reserving Testbed later user need to give input parameters i.e. reserveAt, releaseAt **(startTime and endTime)** to reserve testbed or for reserving testbed now will take current time as reserve time and release time should be provided
